## CABASSE LA SPHÈRE MAKES UK DEBUT AT HARRODS

DANIEL J SAIT x 23RD DECEMBER 2019

[Cabasse](#) UK distributor, [Connected Distribution](#), is installing the £200,000 flagship La Sphère audio system into the new fifth floor technology area in luxury department store, Harrods.

Working with the renowned and multi award-winning French designer and architect, Sylvain Dubuisson, the 1.4m tall speaker's 70cm spherical enclosure is coupled to the helical die-cast aluminium stand, which positions the speaker at the perfect height for listening. Delivery of each La Sphère system to the discerning clients around the world is accompanied by a Cabasse acoustician, who carefully adapts the response of the digital parametric filters to perfectly suit the room.

La Sphère is being demonstrated and sold as a complete system. Customers will take delivery of the entire package, which includes the Cabasse amplifiers and digital signal processor, a Cabasse high-resolution audio streamer, a pre-amplifier from renowned US brand Parasound and cabling from another US high-end audio equipment manufacturer, Kimber Kable.

La Sphère is the culmination of many years’ research into the importance of point source audio reproduction from loudspeaker drive units. Recently updated with a new three-way Tri-Coaxial Aramid drive unit and a 55cm low frequency woofer, which are co-axially mounted and digitally controlled, the manufacturer states that it is the world’s only true point-source four-way speaker, with one acoustic centre, absolute linear phase, optimum impulse response and perfect spatial coherency.

La Sphère is supplied with digital signal processing electronics that handle high-resolution music signals, actively control the crossover points between the loudspeaker drivers and the time alignment of the four acoustic centres. 4,800 watts of the highest quality digital amplifiers complete the package. Standard finishes are pearl, black pearl or glossy black, and any other finish can be supplied at a premium price.

High quality mains cabling has been sourced from UK based specialists, Russ Andrews Accessories and all the equipment sits on a dedicated rack provided by Quadraspire. The retail price is £197,500.
