Cabasse GEN2 Function For StreamCONTROL App

08. March 2021 · [Write a comment](#) · Categories: [Hifi News](#) · Tags: [hi fi news](#), [hifi news](#), [loudspeaker](#), [Loudspeakers](#), [music streaming](#), [streaming audio](#)

French Hifi brand Cabasse has launched a new sound profile, GEN2, available in the Cabasse StreamCONTROL application to enhance the acoustics of its active connected loudspeakers, The Cabasse Pearl and The Cabasse Pearl Akoya.

These acoustic enhancements are now available via both the iOS and Android versions of the Cabasse StreamCONTROL app.

Cabasse GEN2 Function For StreamCONTROL App

Cabasse has integrated the GEN2 sound optimisation, via the Cabasse StreamCONTROL application directly into its on-board software, thus benefiting all users who already own these loudspeakers. By selecting the new GEN2 profile from the application you will discover a brand new sound signature. However, it is possible, depending on your preferences, or the configuration of the speakers in your room, to keep the original version (named 'Original').

Cabasse GEN2 Technical Characteristics

Optimization of the low-frequency dynamics.

Optimised automatic room correction to further preserve the overall balance of the loudspeaker when auto-calibration is activated.

Dynamic Fidelity Enhancer.

Safety and balance at very high volumes.

Availability

The GEN2 profile is now available via the Cabasse StreamCONTROL application for iOS and Android.

Streaming service Spotify has said that both artists and fans have told them that sound quality is important to them. For that reason, they have announced Spotify HiFi. Beginning later this year, Premium subscribers in ‘select markets’, we don’t know where yet, will be able to upgrade their sound quality to Spotify HiFi. Spotify HiFi Spotify says that high-quality music...

Birch Audio are a new company based in Omaha, Nebraska and have very clear aims in the manufacture of their loudspeakers - "To make exceptional minimalist audio equipment". To this end the company currently produces The Raven, The Robin, The Falcon and the Finch loudspeakers. In all their models they use Birch Ply and wideband drivers negating the need for...

Totaldac d100 Loudspeakers have been designed by the French brand to have high sensitivity and be suitable for all types of music genres, from classical music to electro. Totaldac d100 Loudspeakers During the design phase of the Totaldac d100 Loudspeakers, Totaldac used music recorded in the Totaldac Auditorium to give “an absolute feeling of how these instruments should sound”. Totaldac...
