Press Release  
22nd October 2021

**Cabasse presents two new outstanding systems showcasing the best connected HiFi sound at Paris Audio Video Show.**

**Discover the most impressive system,  
THE PEARL PELEGRINA, and the ultra-miniature  
THE PEARL KESHI!**

**From 23rd to 25th October 2021 in the 'salle Bastille' at Novotel Paris Tour Eiffel,  
61 Quai de Grenelle 75015 Paris.**

At the end of September and in celebration of the 70th anniversary of the brand, Cabasse presented its latest high-end speakers, THE PEARL PELEGRINA, a connected HiFi system to the press. This new offering is the quintessence of Cabasse's acoustic know-how and reminiscent of the mythical ultra-high-end flagship system THE SPHERE. October 2021 will see the brand usher in an ultra-compact 2.1 Hi-res connected solution: THE PEARL KESHI!

These two new offerings will be presented to the public during the 2021 edition of PARIS AUDIO VIDEO SHOW (PAVS) as the latest additions to the largest collection of high-end connected speakers on the market - THE PEARL COLLECTION – always with the same guiding principle: to offer the best Cabasse sound whatever the solution.

## THE PEARL KESHI, ultra-compact Hi-Res sound!

After launching the limited-edition version of THE PEARL PELEGRINA, the brand's luxury quadri-coaxial connected speakers that are impressive in both size and technical characteristics (with the capacity to deliver 7400 Watts RMS of pure power and an incredible sound purity to immerse listeners in the heart of sound), Cabasse has announced the release of a new, more minimalist system.

This new 2.1 system has been named THE PEARL KESHI in reference to small natural pearls from Tahiti and the South seas. It combines all the qualities of Cabasse's high-end connected solutions for the most impressive acoustic performance (soundstage, stereo image, timbre, etc.) relative to its miniature size. It consists of a connected subwoofer and two satellites that boast an original design and sitting suspended in the air, the system limits the transmission of vibrations to the floor.

## An ultra-miniature system that delivers immense emotion!

The satellites of THE PEARL KESHI feature a brand-new patented driver and each one is powered by 300 Watts RMS. The design of these full-range speakers allows for long excursion and high-power handling for great dynamics.

An ultra-fine 50 micrometre membrane, a neodymium motor, the associated DSP signal processing (that has been in constant improvement for the last 15 years) and the other speaker components, all contribute to enable faithful restitution of the timbre and provide excellent spectral homogeneity.

With such a minimalist 2.1 connected system, the sound quality and the resulting effect will not leave listeners indifferent. The system is capable of delivering 1050 Watts RMS of total power (300 Watts for each satellite and 450 W for the bass). Listeners will be able to feel all the dynamics of their favourite music, from the most subtle sounds to the most striking ones, without any clipping or distortion.

For an ever-optimised sound, THE PEARL KESHI is equipped with the best technologies:

- DEAP for an optimized digital signal
- DFE for real-time optimisation of the sound dynamics (audio analysis, the dynamics and the volume), a technology that is based on artificial intelligence enabling the listener to find the balance of the original recording whether they're listening at home at a low volume or at a party at full volume
- CRCS technology (automatic room correction system) via the presence of a microphone integrated in the speaker to optimize sound to the listening environment

## **THE PEARL KESHI, the most discreet 2.1 system that blends into your interior decor**

With its 2 minimalist 8 cm diameter satellites and a compact connected 22 cm diameter subwoofer, THE PEARL KESHI integrates discreetly and elegantly in your home whether you install it in your living room, office space or bedroom.

Faithful to the codes of THE PEARL COLLECTION, THE PEARL KESHI has a spherical design and appealing features. Both the satellite speakers and subwoofer have been designed to sit suspended in the air supported by a rough-cut chrome-plated steel base.

In line with THE PEARL COLLECTION, THE PEARL KESHI is made of noble materials that accentuate its performance: 4 successive coats of matt paint were necessary to achieve a perfect rendering of the sphere which is set in a double reinforced shell.

What's more, to satisfy all decorative desires, a wall fixture system for the satellites has been integrated to enable them to be placed in 5 adjustable positions as well as their standard on-base position.

## THE PEARL KESHI, A THRILLING SYSTEM FOR BOTH MUSIC AND HOME CINEMA

Like all other products in the PEARL range this new system integrates perfectly with the Cabasse StreamCONTROL multi-room system and allows playback of all audio files from MP3, AAC, WMA to ultra-high-definition files such as AIFF, FLAC, ALAC, DSD 64 DSD128.

It connects to traditional sources such as turntables, CDs, NAS, etc. as well as to online music services (Qobuz, Tidal, Spotify, Deezer, Web radios, etc.). Finally, THE PEARL KESHI will also provide you with an even more thrilling experience during your home cinema sessions thanks to an optical connection for your TV. In terms of connectivity, the system is equipped with optical inputs and outputs, a mini jack and ethernet and USB connections.

For added listening comfort, a connected remote control with a refined and sleek finish coupled with an ergonomic design comes with the system. This Bluetooth-connected remote-control fits into the palm of your hand and makes for easy and intuitive control of the device: volume adjustment via a rotating ring, input selection, play/pause, as well as the possibility to choose a radio station or your favourite piece of music.

### Technical Characteristics:

- Sound Level: 115 dB peak
- Bandwidth: 30 - 23 000 Hz
- Medium-tweeter : Dom55
- Woofer 17 cm HELD
- Power:
- Left channel: 300 W RMS / 600 W
- Right channel: 300 W RMS / 600 W
- Bass: 450 W RMS / 900 W
- Ethernet - Wi-Fi - Bluetooth
- Micro USB – SPDIF Optical - 3.5 mm Jack
- Formats: WAV - MP3 - AAC -WMA - AIFF - FLAC – ALAC - Ogg – vorbis – DSD 64/128 – WMA lossless
- Automatic Calibration
- DAC 768 kHz / 32 bits
- High-resolution Multi-room
- Subwoofer: 237 x 220 x 266 mm 6 Kg
- Satellites: 101 x 80 x 80 mm 550 grams (per speaker)
- Total System weight : 7 kg

# Cabasse

Depuis 1950

Press Release  
22nd October 2021

## Contents of wooden case:

- Satellites with 3-meter cables included
- Metal stands with wall support
- Connected subwoofer
- Programmable remote control
- Mini jack female RCA adapter / Mini USB to USB
- 1m50 power cable
- User manual

Availability date: End of October 2021. RRP (France): 2490 €

## A propos de Cabasse :

Cabasse, a French company founded in 1950 by Georges Cabasse, has always been committed in its quest for perfect sound and music reproduction without any alteration, coloration, or distortion. Driven by research and the desire to constantly innovate, Cabasse invented and developed coaxial loudspeaker technology. This technology makes it possible to house several loudspeakers in a small space, to offer music lovers and enthusiasts the essence and thrill of pure sound. Cabasse was acquired by Cabasse Group in 2014 (formerly AwoX Group) a pure player of connected technologies and objects dedicated to the Smart Home, a pioneer in DLNA/UPnP and an expert in streaming technology. The company has developed a complete range of high-resolution streaming products combining the best streaming software technologies with ultimate acoustics to become a leader in the dynamic high-end audio streaming market.
