Diving for Pearls

OCTOBER 28, 2021 BY AUDIOGRADE

French audio specialist Cabasse has unwrapped its latest space-age offering, the Pearl Keshi, billed as an ultra-miniature 2.1 active system.

The package includes two spherical satellite speakers with a matching larger subwoofer and Bluetooth remote control. And the sub isn't just there to provide bass brawn, it's also the brains powering the satellites and housing the digital controls, including for hi-res audio streaming.

Priced at £2,299 and available in black or white, visit [Cabasse's website](#) and [Henley Audio](#) in the UK for more details.
