### Cabasse

# ABYSS, for total immersion in a high-resolution sound!

## ABYSS, the new connected stereo Hi-Fi amplifier

This stereo amplifier, which takes its name from the maritime universe dear to Cabasse, illustrates the mystery of the unexplored depths and contains the latest algorithmic innovations on board, magnifying the sound of the speakers, and in particular the brand's traditional high-end speakers. ABYSS is a Hi-fi amplifier that integrates the best Cabasse acoustic innovation technologies and the amplification technologies used in THE PEARL PELEGRINA, the brand's connected flagship for customised sound.

- ideal for Hi-Fi and TV and connected to the Cabasse Multi-room ecosystem!
- A sleek and stylish design with an intuitive LCD colour control screen
- DEAP\* profile specially optimised for Minorca Mc 40, Murano, Java MC40 and Murano Alto bookshelf and floorstanding systems for optimum audio performance.

## **SPECIFICATIONS**

On shelves Usage

Amplification 2 x 215 W RMS / 4 ohms 2 x 120 W RMS / 8 ohms Size

Dimensions (h x  $| x p \rangle$  24,5 x 9,7 x 22 cm

Total weights 3,5 Kg

Finishing Black Satin

#### Cabasse

## ABYSS, ideal for Hi-Fi and TV and connected to the Cabasse Multi-room ecosystem!

ABYSS allows you to listen to all your sources and music platforms in stereo and also integrates a TV socket, so you can experience every movie with incredible dynamics.

The system is also inter-compatible with all other Cabasse-connected systems for high-end sound throughout the home. Each user can group different systems and create zones to listen to all sources (Streaming, TV, Turntable etc..).

#### A sleek and stylish design with an intuitive LCD colour control screen

Available in a satin black aluminium finish, ABYSS is a compact stereo amplifier that fits into any interior. The front panel is equipped with an integrated touch-sensitive, upgradeable controller: a beautiful colour LCD video touchscreen with a volume control ring that allows you to easily change sources, add or change your favourite radio stations and adjust the volume. It also displays the album covers of the albums being played. Its interface will evolve with the system, as will the application.
