Cabasse expands its Luxury Wireless Audio range and unveils its new "Classic Connected" collection at the Paris Audio Video Show 2022

ABYSS

RIALTO

PAVS - From 05th to 06th November 2022 - Palais des congrès de Paris, Porte Maillot - press evening from 17:30 on 04th November

Cabasse, the iconic French brand leader in the Hi-fi acoustic market, continues to modernise traditional Hi-fi with audio systems that combine the brand's acoustic excellence with the best connectivity technologies available today.

In 2018, after launching THE PEARL collection exceptional connected systems with a "lifestyle" design (the widest range of high-end connected systems to date), it now presents the "Classic Connected" collection, allowing to offer the best streaming sound and the innovations of THE PEARL COLLECTION. The new collection offers the best streaming sound and the innovations of THE PEARL range to a more traditional bookshelf or floorstanding speakers, either in an integrated format (RIALTO) or through a high-end amplifier (ABYSS).

RIALTO is a connected Hi-fi stereo system in a bookshelf format and ABYSS is a high-resolution connected amplifier, a concentration of innovations and the best streaming and amplification technologies.

Rialto, the symbol of a historic bridge between Hi-Fi and connectivity.

Inspired by the most famous and ancient bridge in Venice, this new audio system, composed of two connected active loudspeakers, has a compact bookshelf format and soft, rounded lines reminiscent of the brand's iconic Murano speakers. The Rialto system incorporates the best acoustic and software innovations developed by Cabasse over the last ten years.

A versatile audio system, designed for both Hi-fi and TV, Rialto allows you to listen to all sources and all musical platforms in stereo. It also integrates a TV connection that allows you to experience each film with incredible dynamics.

Worthy of the most high-end systems, with its integrated microphone (CRCS*), this compact and wireless set has been designed and developed to enjoy optimal Hi-fi stereo listening quality, thanks to Cabasse's patented automatic room calibration. In addition, on the Cabasse StreamCONTROL application, users will be able to personalise their sound even more thanks to innovative optimisation tools developed to adapt to their interiors and preferences.

In terms of ergonomics, RIALTO presents a touch screen control on its main speaker, which is very practical and useful, whether to simply increase or decrease the volume with its rotation ring, change its sources or add or modify its favourite radios, without having to go through the application.

The colour LCD video screen also displays album covers and offers a scalable control interface that is regularly updated with new software updates.

RIALTO is available in white or satin black wood finish, in Cabasse authorised dealers at a guide price of €2990.

Cabasse unveils its new connected stereo Hi-Fi amplifier, ABYSS, for total immersion in a high-resolution sound!

This stereo amplifier, which takes its name from the maritime universe dear to Cabasse, illustrates the mystery of the unexplored depths and contains the latest algorithmic innovations on board, magnifying the sound of the speakers, and in particular the brand's traditional high-end speakers. ABYSS is a Hi-fi amplifier that integrates the best Cabasse acoustic innovation technologies and the amplification technologies used in THE PEARL PELEGRINA, the brand's connected flagship for customised sound.

ABYSS, ideal for Hi-Fi and TV and connected to the Cabasse Multi-room ecosystem!

ABYSS allows you to listen to all your sources and music platforms in stereo and also integrates a TV socket, so you can experience every movie with incredible dynamics.

The system is also inter-compatible with all other Cabasse-connected systems for high-end sound throughout the home. Each user can group different systems and create zones to listen to all sources (Streaming, TV, Turntable etc..).

Application Multiroom Cabasse StreamCONTROL

A range of technologies to enhance all passive speakers:

- **Depending on your room, you can use the listening position setting:** a setting that takes into account the listening position in the room to faithfully reproduce the music captured by the ear.
- **For your preferences, use the DFE*:** this setting allows you to find the balance of the original sound whether in-home music mode or evening mode at full volume. Signal processing algorithms optimise the power sent to each speaker in real-time, taking into account the listening level, spectral content and dynamics of the song.

These technologies are constantly being improved and are automatically integrated over time by simple updates to the Cabasse StreamCONTROL application. The amplifier thus evolves, with the technological evolutions of Cabasse.

Users will be able to further optimise their ABYSS amplifier via patented DEAP* (Digital Enhancement of Acoustical Performance) technology, which ensures a perfect synergy between the amplification and the speaker characteristics. This technology enhances the performance of Cabasse loudspeakers through dynamic multi-band signal processing with feedback loops that allows the full power of the available amplification to be used consistently. With this digital signal processing (DSP), Cabasse performs an average of more than 290 million operations per second after taking into account the user's own settings.

DEAP* profile specially optimised for Minorca Mc 40, Murano, Java MC40 and Murano Alto bookshelf and floor-standing systems for optimum audio performance.

MURANO ALTO + ABYSS

A sleek and stylish design with an intuitive LCD colour control screen

Available in a satin black aluminium finish, ABYSS is a compact stereo amplifier that fits into any interior. The front panel is equipped with an integrated touch-sensitive, upgradeable controller: a beautiful colour LCD video touchscreen with a volume control ring that allows you to easily change sources, add or change your favourite radio stations and adjust the volume. It also displays the album covers of the albums being played. Its interface will evolve with the system, as will the application.

ABYSS connected amplifier, available from December 2022, at a guide price of €1690

Technical specifications: Class D stereo amplifier - Amplification x2: Chanel: 2 x 215 W @ 4 Ohms - 2 X 120 W @ 8 Ohms - Weight: 7,72 lbs - Dimensions: L: 9,65 H: 3,82 P: 8,7 inches
Supported formats: MP3 - AAC -WMA - AIFF - FLAC – ALAC Ogg- Vorbis - DSD 64/128 - WMA lossless
Connectors: Ethernet – Wi-Fi – Bluetooth – Optique SPDIF – Analog RCA – USB –TV plug – Output Sub plug headphones in front.

*CRCS: Automatic Room Calibration

*DFE: Dynamic Fidelity Enhancer

* DEAP: Digital Enhancement Of Acoustical Performances

RIALTO and ABYSS are compatible with all Cabasse-connected systems!

To get high-end sound in every room of the house, users can group RIALTO and ABYSS with other Cabasse connected systems, including THE PEARL lifestyle range. It is also possible to create zones for listening to different sources (streaming, TV, turntable etc.). An absolute listening pleasure wherever you are!

About Cabasse:

Cabasse, a French company founded in 1950 by Georges Cabasse, has always been committed to the perfect reproduction of music and sound without any alteration, colouration, or distortion. Driven by research and the desire to constantly innovate, Cabasse invented and developed the coaxial speaker technology. This technology allows several speakers to be housed in a small space, offering music lovers the essence and thrill of pure sound.

Since 2014, Cabasse has been owned by Cabasse Group (formerly AwoX), european group, leader in the Smarthome market, a pioneer in Multiroom and DLNA/UPnP and streaming technologies. The company offers a complete range of high-resolution connected systems combining the best of streaming software technologies with the best of acoustics, thus becoming a reference in the dynamic luxury wireless audio market.
