For its 75th Anniversary, Cabasse Unveils Two Exceptional New Systems at High End Munich 2025

Cabasse, the iconic French brand and a pioneer in high-fidelity acoustics, continues to reinvent traditional Hi-Fi with innovative systems designed to satisfy the most demanding audiophiles. Celebrating its 75th anniversary (1950–2025), and building on its acoustic expertise and wireless audio technology mastery, the brand unveils its new Master Piece, along with an ultra high-end home theater system.

In 2006, Cabasse introduced LA SPHÈRE, a one-of-a-kind stereo system featuring quadri-coaxial technology, created to captivate music lovers in search of excellence. This exceptional system, which requires external equipment (Cabasse amplifiers with a 4-way digital stereo processor, preamplifier and high-resolution Cabasse streamer), is still handcrafted to order in the brand's Brittany workshops. A true icon, LA SPHÈRE remains a major source of inspiration for Cabasse engineers.

Building on this success, the brand has envisioned a new, more compact system that incorporates its finest acoustic and software technologies, delivering a unique sound experience with **LA SPHERE EVO**.

A Unique Heritage, Exceptional Acoustic Performance:d'exception :

For unmatched sound quality, extreme precision, and absolute purity, Cabasse selected ultra-high-performance speakers, designed and manufactured in its Brest (Brittany) workshops.

- The renowned TCA tri-coaxial driver (high, midrange, and low-midrange based on aramid fibers), already featured in the brand's most prestigious models, including LA SPHÈRE, ensures faithful and precise reproduction of timbres.
- Bass: 2 x 30 cm HELD drivers in push-push configuration for optimal vibration control.
- Amplification : 4 amplifiers per speaker for a total output of 10,200 W RMS – 127 dB.
- Extended frequency range: 14 Hz – 27,000 Hz.
- Latest-generation DSP processing for total sound immersion, extreme precision, and uncompromising dynamics.

Compactness and Absolute Simplicity:

A true feat of integration, this 4-way active stereo system houses all amplifiers, DACs, and streamers in a base just 7 cm thick. No cables, no external amplifiers to install or configure.

Easy to install and use, its performance is optimized thanks to an integrated microphone inside the speaker, which enables automatic room calibration for perfect acoustic adaptation.

In addition, the system is extremely easy to control using the Cabasse StreamCONTROL app, allowing precise and customizable adjustments.

The speakers are compatible with the Cabasse multi-room ecosystem and are also Roon Ready.

A Strong, Refined, and Elegant Design:

The challenge: to retain the aesthetic lineage of LA SPHÈRE while making it lighter and easier to install.

Let's recall that LA SPHÈRE is a system of exceptional proportions, standing 1.40 meters tall and weighing 98 kg, whereas LA SPHERE EVO measures "only" 1.34 meters and weighs 60 kg.

The central stand has been replaced with an exclusive, fluid-shaped base inspired by Cabasse's signature Lissajous curves—an airy design crafted in mirror-polished chrome, which discreetly conceals all wiring.

New grilles feature intricate wave-like patterns, revealing glimpses of the speakers.

Exceptional French Craftsmanship:

Entirely designed by Cabasse's in-house teams in France, each speaker is individually crafted and tested in an anechoic chamber at the brand's workshops in Brittany.

Details and Finishes:

- Sphere and base: matte black with five coats of finish
- Grilles: 3D stainless steel wave patterns
- Front speaker ring: chrome finish
- Stands: mirror-polished chrome
- Bases: machined aluminum
- Joints: machined stainless steel

Dimensions: 134 x 62 x 62 cm

Weight: 60 kg / speaker

Finishes: matte black and chrome

To commemorate the brand's 75th anniversary, each speaker is individually numbered with a plaque affixed to its base.

Lifetime warranty on speaker drivers

Suggested retail price: 120.000 €

Available in Q3 2025

Technical Specifications:

Inputs:

- 1 x HDMI eARC/CEC (ARC compatible)
- 1 x analog RCA (unbalanced)
- 1 x analog XLR (balanced)
- 1 x optical TOSLINK S/PDIF
- 1 x USB (service & playback)
- 1 x Ethernet plug

Wired outputs:

- 1 x TOSLINK S/PDIF (primary/secondary link)

Wireless connectivity: Wi-Fi

THE PEARL THEATER:

To complete the THE PEARL collection, Cabasse introduces a wireless, ultra-compact Hi-Fi home theater system:

THE PEARL THEATER is a connected, plug & play system, incredibly simple to set up, offering an unmatched power-to-size ratio, with outstanding performance in both home cinema and high-fidelity music playback.

A fully wireless setup, with ultra-discreet satellites (Ø 7.5 cm) featuring adjustable wall or ceiling mounts. Equipped with patented full-range speaker drivers.

A sleek amplifier featuring an LCD screen for volume and source control.

A powerful, compact, and elegant subwoofer (Ø 32 cm) with a patented HELD woofer and two wireless modules. Easy operation via the Cabasse StreamCONTROL app for precise and intuitive control and customization.

A home theater system equipped with cutting-edge technologies, optimized for TV, cinema, and music:

- Supported formats: DTS, DTS HD, DTS-X, Dolby Digital, Dolby Atmos, Dolby True HD, etc..
- Connectivity: HDMI eARC, optical, USB, RCA, headphone jack, Ethernet, Wi-Fi, Bluetooth
- Advanced settings: equalizer, listening position, night mode, DFE, TBUP

Comprehensive music services: AirPlay 2, Roon Ready, Control4, Qobuz, Spotify Connect, Tidal Connect, Napster

Supports Dolby Atmos playback via HDMI

- Cabasse multi-room compatible

5.1 pack contents:

- 1 x AV receiver with LCD touchscreen controller (3 x 100W for L/C/R)
- 1 x subwoofer
- 5 x satellites
- 2 wireless modules (50W for rear channels)

Remote control included

Satellites available in black or white with adjustable chrome mounts

Subwoofer available in black or white, coordinated with the satellites.

Optional adjustable floor stands in black or white

Suggested retail price: €6,990 (5.1 version) and €7,990 (5.1.2 or 7.1 versions)

Available starting in Q3 2025

Other configurations available:

Optional: 1 extra subwoofer (MSRP €2,990) and 1 kit of 2 satellites with wireless modules (MSRP €1,290) for configurations such as 5.2, 5.2.2, or 7.1.2

About Cabasse:

Cabasse (Euronext Growth® Paris – FR001400DIY6 – ALCAB) is a French company founded in 1950 by Georges Cabasse that has always been committed to the perfect reproduction of music and sound without any alteration, coloration, or distortion. Driven by research and the desire to constantly innovate, Cabasse invented and developed the coaxial speaker technology. This technology allows several speakers to be housed in a small space, offering music lovers the essence and thrill of pure sound. After more than 70 years of innovation and acoustic engineering, Cabasse has launched in 2018 THE PEARL COLLECTION, the most complete collection of high-resolution connected active speakers of the world Luxury Home Audio market. Cabasse is 42.27% owned by VEOM Group (Euronext Growth - FR0013530102 - ALCG), a leading European group in the Smart Home universe, pioneer in multi-room and streaming technologies.
